

Hands Down! – The Best ERP VALUE for Small and Mid Size Business

AQUILON
ERP SOFTWARE SOLUTIONS

Affordable, adaptable and proven.

ERP for SMB - Extravagant Luxury OR Critical Business Tool?

It used to be that Enterprise Resource Planning (ERP) was an expensive luxury that only large companies could afford, that's no longer the case with Aquilon ERP.

A feature rich, fully integrated business software system is no longer a luxury but an indispensable business building tool for small and mid-sized businesses. The RIGHT ERP system will increase your competitiveness, decrease your costs and provide for leveraged growth.

Low TCO - Best value for the money

Aquilon ERP software is the best value for money in the ERP marketplace today. Our low TCO (Total Cost of Ownership) provides you access to many of the features and functionality your larger competitors have, but at an affordable price. Our FAST implementation system further reduces your implementation costs by enabling you to go live in a compressed time period. After all, time is money!

Your Success Is Our Goal

It's important to us that our customers license the right system and implement it quickly and efficiently. That's why we do a "discovery call" with our potential clients to find out what features and functionality they need and review their overall business objectives. If we are not a fit, we excuse ourselves and move on. If there is a strong potential for a good fit, we go to the next step and work together through a live demo where we review and discuss the features and functionality that are crucial to running your business successfully. If you like what you see and decide to work with us further, we'll ensure that our system is implemented quickly and efficiently, to keep your costs down.

Your
Success
is
Our
Goal

Minimize Your Risk with our Money Back Guarantee

We'll work diligently with you for as long as it takes, to ensure we are the right fit and right partner for your company. If however, at any stage within the first 60 days of the implementation you discover that Aquilon ERP is not the right product for you, we will refund 85% of your software license fees and the balance of your prepaid implementation fees.

Available functionality with Aquilon Software
